Title : Cloud Management and
Automation Fundamentals
Exam

Version : DEMO

1.A consultant has been hired to architect a hybrid cloud solution for a client. The consultant decides to build two clouds: one for development and one for production. Which product can move workloads from the development cloud to the cloud?

- A.vFabiic Suite
- B.vCloud Connector
- C.vCenter Server
- D.vRealize Operations

Answer: B

2.An organization is evaluating to a hybrid cloud infrastructure. They already manage an onsite vsphere environment and want to better understand the benefits of migrating data to vcloud air.

What would be a compelling reason for the client to migrate to a hybrid cloud solution?

- A.They will be able to use storage clusters and Storage Distributed Resource Scheduling.
- B.They will be able to more easily optimize the provisioning and performance of their virtualized workloads.
- C.They will be able to place their mission-critical virtual machines under Fault Tolerance rotection.
- D.vRealize Automation will allow them to leverage vSphere Distributed Switches.

Answer: C

3.An administrator for a regional service provider has a predominately mobile client base.

Which statement represents an availability challenge that this administrator might face?

- A.The clientswant to work on business problems instead of worrying about always been"hands on" with their virtual workloads.
- B.The clients need connectivity and flexibility without being required to host their own internal VPN services.
- C.The clientshave workloads in your data center and want to migrate to hosting providers in different geographical areas.
- D.Theclients need the ability to quickly deploy preconfigured workloads on demand.

Answer: D

4.An administrator is examining a data center to validate that it is operating as efficiently as possible.Which option represents an Efficiency challenge the administrator might face?

- A.Needing to easily roll back changes to workloads during testing and development.
- B.Wanting to provide multi-tenant access to cloud resources without compromising security.
- C.Needing semi-isolated and autonomous environments for the application development teams.
- D.Wanting to align IT costs with corporate models by classifying IT as an operating expense.

Answer: C

5.A manager wants to know why traditional usage metering tools are less effective in a private cloud environment thanthey are in physical environments.Whatstatement provides the best response?

- A.Traditional monitoring tools won't work in a cloud environment.
- B.Traditional metering tools require agents to be installed, which don't work in virtual machines.
- C.Resource usage is based on the overall demand of all virtual machines instead of per server.
- D.This is not true, traditional usage metering tools are still the best choice.

Answer: B
