An administrator runs an analytic search for all FortiGate SSL VPN logon failures. The results are grouped by source IP, reporting IP, and user. The administrator wants to restrict the results to only those rows where the COUNT >=3.

Which user would meet that condition?

- B. Sarah
- C. Admin
- D. Tom

Answer: D

Consider the five account locked events received by FortiSIEM from domain controllers within the last 10 minutes (ten minutes is the evaluation window for the subpattern DomainAcctLockout):

Reporting IP: 1.1.1.1, Reporting Device: Server101, User: John, Domain: USA, Event Type: Account Locked

Reporting IP: 1.1.1.1, Reporting Device: Server101, User: Craig, Domain: USA, Event Type: Account Locked

If you look for one or more matching events and groupings by the same reporting IP address, reporting device, and user, how many incidents are created?

- A. 3
- B. 4

C. 2

D. 1

Answer: C
